RAJAN KUMAR

CYBERSECURITY · AI / ML ENGINEERING · FRESHER

Sitamarhi, Bihar | +91 7970384336 | rsjankumar23105@gmail.com | LinkedIn | GitHub

SKILLS

Programming

- Python — Advanced (2+ yrs)
- Java / Kotlin — Intermediate
- C, C++

Security & Networking

- Computer Networks
- Cryptography & Network Security
- CCNA: Networking, Switching/Routing, Enterprise Security & Automation

AI / Machine Learning

- Machine Learning, Deep Learning, NLP
- NumPy, Pandas, Matplotlib
- Tkinter GUI, Speech Recognition

Core CS & Tools

- DBMS, OS, DSA, Compiler Design
- Blockchain, IoT
- HTML, CSS, Linux, Windows OS

CERTIFICATIONS

- NPTEL (IIT Kharagpur) — Blockchain and its Applications, Elite, 65%
- NPTEL (IIT Kharagpur) — Intro to Internet of Things, 58%
- Cisco CCNA — 3-course track (Networks, Switching/Routing, Security & Automation)
- Cisco — Python Ess. 1 & 2, C++ Ess. 1, Intro to Modern AI, Intro to Data Science, Apply AI
- Cisco — Linux OS, Windows OS, Mobile OS & Security
- iHUB DivyaSampark, IIT Roorkee × Govt. of Bihar — 40-hr IoT program

EDUCATION

B.Tech, Computer Science & Engineering

Sitamarhi Institute of Technology (Bihar Engineering University) · Expected 2027

CGPA: 7.69 / 10

Class XII (Science) — 67% · Class X — 65%

PROFILE

Final-year Computer Science undergraduate (fresher) building a foundation across networks, cryptography, and applied AI/ML. Completed a security-focused internship at BSPTCL analyzing a critical-infrastructure malware case study, and an AI/ML internship at NIELIT covering Python, machine learning, and NLP. Cisco CCNA-trained in networking and security fundamentals — looking to grow into a cybersecurity or AI engineering role at a company that values curiosity and hands-on problem-solving.

PROJECTS

CyberShield — Cybersecurity Threat Detection System · *Python, Scapy, Flask, scikit-learn*

— Built a network threat detection system: 8 rule-based detectors (port scans, SYN floods, brute force, DNS tunneling, and more) mapped to MITRE ATT&CK, plus an Isolation Forest ML model flagging traffic anomalies. Added malware analysis and a Flask + SocketIO live dashboard with a REST API.

CampusConnect — College Community Platform · *React, Node/Express, MongoDB · Live on Vercel*

— Built a full-stack MERN platform (53 commits) for college communities — notes sharing, lost & found, events, marketplace, and a placement dashboard with analytics — deployed live on Vercel/Render.

— Integrated Anthropic Claude for AI features: a study assistant, quiz generator, and resume review tool; added JWT auth, Cloudinary uploads, and an admin panel.

Emergency Help Network · *React, Node.js, Expo/React Native, Socket.IO*

— Built a real-time emergency assistance platform (36 commits) spanning a backend, web dashboard, and mobile app (Expo/React Native) — SOS alerts, live location tracking, and Socket.IO-based responder coordination.

INTERNSHIPS

Project Trainee — IT Department Jun 2025 (4 weeks)

Bihar State Power Transmission Company Ltd. (BSPTCL), Patna

— Completed project training on real-time case studies and analysis of critical-sector security, focused on the TRISIS malware attack (2017) on industrial safety instrumented systems.

Intern — AI and ML using Python Mar – May 2026 (90 hrs)

National Institute of Electronics & Information Technology (NIELIT), Gorakhpur (Online)

— Completed a 90-hour hands-on program covering Python, database connectivity, GUI development with Tkinter, speech recognition, and data handling with NumPy, Pandas and Matplotlib.

— Studied core machine learning, deep learning, and NLP concepts; graded S (80%+).
